INTRODUCTION

Ronald Calder Kershaw was born in Melbourne on 7 December 1920, the son of Harold Edgar Kershaw, grandson of James Andrew Kershaw, Director of the Museum of Victoria from 1929 to 1931 and great grandson of William Kershaw, who settled in Victoria in 1848. William Kershaw (1820-1899) was the first taxidermist at the Museum of Victoria. Ronald followed a long family interest in natural history and association with the Museum of Victoria, his special interest in molluscs being influenced by his grandfather.

Mr Kershaw served with the AIF during the Second World War. In 1948 he moved to Tasmania with his wife Winifred Mary (nee Bull). They had two daughters and lived for some years on a farm at Clarence Point on the West Tamar.

Employed by the State Government's Department of Agriculture from 1965, he worked at the Mount Pleasant Laboratories in Launceston from 1966 until his retirement in 1978. However during this time and after his retirement, he continued his personal research into the collection, identification, distribution and recording of mollusc species. He worked closely with Dr Brian Smith, formerly Senior Curator of Invertebrate Zoology at the Museum of Victoria, later Curator of Zoology at the Queen Victoria Museum and Art Gallery, and together they wrote two books on terrestrial mollusca. Numerous articles and papers followed his first paper, which appeared in the *Victorian Naturalist* in 1947. The collection contains a large quantity of correspondence with academics and other people studying molluscs in Australia and overseas.

His research was recognised through election to the Royal Society of Tasmania, appointment as Honorary Associate in Malacology at the Queen Victoria Museum and Art Gallery (1956), Honorary Associate in Invertebrate Zoology at the National Museum of Victoria (1977) and Honorary Research Associate at the Queen Victoria Museum and Art Gallery in 1980, the first person to receive this appointment at the QVMAG. He was a member of a number of organisations including Field Naturalists' societies, Malacology Society of Australia and of South Australia, Australian Museum Society, Australian Society for Limnology, International Society for Medical and Applied Malacology and Northern Tasmanian Camera Club. Whilst living at Clarence Point he was Chairman of Directors, Egg and Poultry Supplies Pty Ltd and a member of several local community organisations.

He was also interested in current affairs and wrote to a number of politicians, both State and Federal, on various topics.

Ronald Kershaw died in Launceston on 15 March 2003, survived by his wife and two daughters. (*Examiner* 19 March 2003, death notice)

The Kershaw collection was donated to the Queen Victoria Museum and Art Gallery in 1994, 1996 and 1997.
